EDUCATION

- Birla Institute of Technology and Science, Pilani** Pilani, India
Bachelor of Science in Computer Science with Honours in AI & ML (GPA: 9.2/10) Aug 2024 – 2028
- Guru Gobind Singh Indraprastha University** New Delhi, India
Bachelor of Technology in Artificial Intelligence and Data Science Aug 2024 – 2028

EXPERIENCE

- Razorpay** — *Central AI Initiatives (Founders Office)* Bengaluru, India | Jun 2026 – Present
 - Training a **Payments Foundational Model**, working on **A2A (Agent to Agent)** systems and finetuning **major open-source LLMs** for payments-specific context.
 - Building **org-wide and external AI applications** on a **5-person central AI team reporting directly to the CEO**, at an organization processing **35+ million payments daily**.
- Nas Company** — *AI Summer Resident* Dubai, UAE | Jul 2025 – Aug 2025
 - Handpicked as **1 of 8 AI Developers** from **18,000+ global applicants** by **Nuseir Yassin (Nas Daily)**.
 - Shipped **4 projects in 4 weeks**, including an experimental **AI finetuned on Religious Texts** for constrained philosophical voices; helped conceptualize a [viral ad for nas.io](#) (\$27M+ raised) with **2M+ organic views**.
- Perplexity** — *AI Business Fellow* San Francisco, USA, Remote | Mar 2025 – Aug 2025
 - Selected for a **competitive global fellowship** developing **AI strategy and GTM expertise** for Enterprise AI, with direct executive sessions from **NVIDIA's Jensen Huang** and **Box's Aaron Levie**.
 - Contributed to **AI monetization strategies** and **SLM deployment research** through GTM experiments for AI-driven knowledge work.

RECOGNITION

- AI Venture Builder** — Founder of [PolyThink Labs](#) (Building Generative UI for LLMs) and previously founded **TREAT AI (acquired)**, an open-core platform working on media content safety.
- OpenAI OSS Model Closed feedback (APAC devs)** — Shared insights working with **SLMs (Small Language Models)** on TREAT in a call with **Sam Altman and the OpenAI team**, providing feedback on their **SOTA Open Weight models (GPT OSS 20B, 120B)**.
- Disproving WOWII Conjectures 63 & 85 with Agentic Loops** — Disproved two graph theory conjectures that had been open for **22+ years** with **agentic loops running GPT 5.6**, [cited in a clique paper by Jonas Gebendorfer](#), with a [formal conjecture request to Google DeepMind](#).

PROJECTS

- Claurst** | *Rust, TypeScript, Claude Code, Codex, Multi-Provider API Harnesses*
10,000+ GitHub stars. Featured on [Decrypt](#), taught in a [Michigan State University lecture](#). The **most optimised TUI coding agent** — a **Rust-native binary** with **multi-provider support**, **custom modes**, enhanced privacy, and more.
- The Backdoors** | *JavaScript, Canvas API, Code Minification, Compression Algorithms, DecompressionStream API*
Top Hacker News post for 3 days (600+ upvotes). Covered by [PC Gamer](#) and [TechSpot](#), *cited in an ex-NASA Scientist's research paper (arXiv:2506.11008)*. Ported a version of DOOM inspired by the Backrooms, **self-contained in a QR code**, with a **custom compression pipeline**.
- .MEOW Image Format** | *Python, PNG Binary Spec, Custom Steganographic Encoding, JavaScript*
Reached Hacker News front page, adopted **on-chain by two exchanges**, tokenized with **\$250k liquidity in 3 nights** — royalties funded my entire university tuition. Developed a **steganographic, PNG-compatible image format** with **650+ hidden bytes**.
- ClawX** | *Next.js, AI Agent Skills, MCP, SSR, LLM APIs, Programmatic SEO*
85,000+ dynamically rendered pages. [Featured by The Independent](#). Built the human interface for **MoltBook** (Social Network for AI Agents), modelled after Twitter, with AI Agent browsing modes — doubles as a **pSEO aggregator**.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, TypeScript, Rust, SQL, C, HTML, CSS, R, Lua
- Technologies:** React, Next.js, Node.js, Tableau, FastAPI, TensorFlow, Transformers.js, PyTorch, Gradio, Flask
