Education

- **Birla Institute of Technology and Science, Pilani** — Pilani, India
  Bachelor of Science in Computer Science with Honours in AI & ML (GPA: 9.2/10) — *Aug 2024 – 2028*
- **Guru Gobind Singh Indraprastha University** — New Delhi, India
  Bachelor of Technology in Artificial Intelligence and Data Science — *Aug 2024 – 2028*

Experience

- **Razorpay** — *Central AI Initiatives (Founders Office)* — Bengaluru, India | Jun 2026 – Present
  - Part of the team training a **Payments Foundation Model**, working on **A2A (Agent to Agent) systems** and finetuning major open-source LLMs for payments-specific context.
  - Building org-wide and external AI applications on a **5-person central AI team reporting directly to the CEO**, at an organisation processing **35+ million payments daily**.
- **Nas Company** — *AI Summer Resident* — Dubai, UAE | Jul 2025 – Aug 2025
  - Handpicked as **1 of 8 AI Developers** from **18,000+ global applicants** by Nuseir Yassin (Nas Daily).
  - Shipped **4 projects in 4 weeks**, including an experimental **AI finetuned on Religious Texts** for constrained philosophical voices; worked on viral videos and ads for nas.com (**$27M+ raised**).
- **Perplexity** — *AI Business Fellow* — San Francisco, USA, Remote | Mar 2025 – Aug 2025
  - Part of an executive fellowship on **enterprise AI strategy and GTM experiments**, with live interactive sessions from **NVIDIA's Jensen Huang**, **Box's Aaron Levie** and more.

Recognition

- **AI Venture Builder** — Founder of **PolyThink Labs** (Building Generative UI for LLMs) and previously founded **TREAT AI (acquired undisclosed)**, an open-core platform working on media content safety.
- **Kepler Planetary Candidate** — **Wrote a pixel-peeping algorithm with Codex** that combined raw pixels from thousands of stars in old Kepler archives to **discover a planetary candidate** orbiting a red dwarf (KIC 5689121) in the constellation Lyra, dimming every **13.77 days**.
- **Agentic Mathematical Counterexample Discovery Program** — **Disproved 11+ graph theory conjectures** (some **open 30+ years**), starting with **WOWII 63 & 85**, with agentic loops running GPT 5.6 and Claude Fable in Claurst, cited in a clique paper by Jonas Gebendorfer; now working with **Google DeepMind's** formal-conjectures maintainers to facilitate the program — **15+ formalisations** and **22 PRs** upstream.

Projects

- **FLM (Fly Language Model)** | *PyTorch, Language Model Training, TypeScript, WebGL* | GitHub
  Trained a language model from scratch on a recurrent core built from the fruit-fly connectome (1,024 neurons, 76K edges), benchmarked against parameter-matched GRU/transformer baselines on WikiText-2 and BabyLM. Ablations isolate the predictive gain (0.12 BPB) to temporal state over fly-specific wiring; 5 working papers. Runs fully in-browser with live neural state and neuron-level interventions.
- **Claurst** | *Rust, TypeScript, Claude Code, Codex, Multi-Provider API Harnesses*
  10,000+ GitHub stars. Featured on Decrypt, taught in a Michigan State University lecture. The **Highly Optimised TUI coding agent** — a **Rust-native binary** with multi-provider support, custom modes, enhanced privacy, and more.
- **The Backdooms** | *JavaScript, Canvas API, Code Minification, Compression Algorithms, DecompressionStream API*
  Top Hacker News post for 3 days (600+ upvotes). Covered by PC Gamer and TechSpot, *cited in an ex-NASA Scientist's research paper* (arXiv:2506.11008). Ported a version of DOOM inspired by the Backrooms, **self-contained in a QR code**, with a custom compression pipeline.
- **Native macOS Driver for a Windows-Only HP Printer** | *C++, CUPS, SpliX, IOKit, Reverse Engineering, Claude Code*
  3.5M+ views, #1 trending on X. Covered by Tom's Hardware, The Register and more. A **native Apple Silicon driver** for the Windows-only **HP Laser 1008a** — reverse-engineered Samsung's raster path, patched **SpliX**, wrote an **IOKit USB helper** to print with Cmd + P, in a single 4-hour Claude Code session.

Technical Skills

- **Languages**: Python, JavaScript, TypeScript, Rust, SQL, C, HTML, CSS, R, Lua
- **Technologies**: React, Next.js, Node.js, Tableau, FastAPI, TensorFlow, Transformers.js, PyTorch, Gradio, Flask
